

Lineup of our bonsai items

the Yokohama Nursery

Arimetz

our original product

Our original product, ant killer! Now sold in Japan, Malaysia and Singapore only!
It is sold in Japan for 95 years!

Its ingredients are;
42.6% of water
56.3% of sugar
1.1% of boric acid

If you find lines of ants in your house or office,
add 10 drops of Arimetz on the plate, leave it on ant's path.
Each ant brings Arimetz drops to their home.
Then, it exterminates the entire ant's nest.
You won't see them in your house any more!

Arita pots

our original product

We re-produced old designed pots appeared in Ukiyoe, traditional Japanese paintings. Our custom made products!

Limited quantities!

Fertilizer

Biogold Original Solid manure

One of the best selling top dressing fertilizers,
made of chicken manure
4 sizes, 240g, 900g, 2.4kg & 5kg

A basic manure that can be used for all plants.
It contains not only N-P-K, but also rich natural minerals in a well-balanced.

Since the manure is carefully aged over time, so even if you feed them too much, no need to worry about damaging plants.

N:P:K=3.5:3.7-3.3

Basic usage :①Placed directly on the soil (Duration: approx. 2months)
②Liquid manure :Dissolve 2 or 3 tablets in 1L

Tamahi Solid manure

Tamahi, made of oily dregs
S and L size, 3kg, 5kg & 8kg

made from oily dregs (Oil-cake) with Bone chips
This fertilizer provides slow and long-lasting fertilizer effects.

N:P:K=5:2:1

Basic usage : Placed directly on the soil (Duration: 50~60Days)

Hanagokoro Solid manure

Hanagokoro, made from oil cake
Size 500g

The fertilizer effect slowly, so it will grow into a strong stock plant.
By adding fast-acting fertilizer, stable effects can be obtained from the begging.

N:P:K=4:5:2

Basic usage : ①Placed directly on the soil (Duration: approx. 1 months)

Green King Solid manure (small pellets)

Green king, made from oily dregs (Oil-cake) with Bone chips
Other trace elements support the activity of soil bacteria.
natural animal organic manure
Sizes 20Kg

N:P:K=6:5:2

Basic usage : Placed directly on the soil
(Stable effect for about 60 days after fertilization)

HB-101 natural plant vitality liquid

It dissolves in the cell fluid of leaves, roots, and stems in a well-balanced manner and energizes cells. Produces lush leaves and strong stems and roots.

Basic usage for Bonsai : Sprinkle water on the soil or spray water on the front and back of the leaves
Dilute 1cc of HB-101 with water per 10m² (1000x to 10,000x solution)
standard is once a week

Liquidas ampoule plant activator / vitality liquid

Contains three active ingredients, choline and fulvic acid, which enhance the absorption of nutrients necessary for plant growth. Three synergistic effects bring out the inherent power of plants and grow healthy plants.

Basic usage for bonsai : 1,000 times diluted 《5 liters of water, 1/4 cap (approx. 5 ml)》
(once a week)
Flowers, flowering trees : 200 times diluted (2 liters of water, 1/2 cap (approx. 10 ml))

Menedael plant vitality elements

A plant vitalizing element that contains iron, which is essential for plant growth, in the form of ions that are easily absorbed by the roots.

Promotes rooting and grows into a healthy plant. It is useful in all situations, from cuttings, sowing, planting, and replanting to boosting vitality when the plant is weak.

Basic usage for bonsai, potted plants : Spray the 100x solution on the ground or on the leaves

Callus mate speed up healing of tree wounds

Apply it to quickly heal the cuts after pruning a tree. Protects the wound and prevents moisture from evaporating and rainwater. Prevents withering and accelerates callus formation.

Basic usage : Approximately 2 to 5 g per 5 cm cut is standard.

Lime-sulphur, 18L Bactericidal and insecticidal effects 石灰硫黄合材

Lime-sulphur mixture is a chemically synthesized substance that is classified as a pesticide and has bactericidal and insecticidal effects. It is also highly effective in controlling overwintering pests of fruit trees, such as scale insects and spider mites.

Basic usage :

By spraying most plants during their dormant period from January to February, you can prevent pest damage that tends to occur after spring. You can also apply makeup to Jin and Shari with this.
